

Sedad Daneh Novin

Aquaculture Feed Production

Sedad Daneh Novin

Uncompromising Quality

Precision-engineered production cycles, ensuring excellence from raw material selection to the final product.

Pioneering Nutrition

Driving the future of aquaculture with evidence-based research and cutting-edge nutritional science.

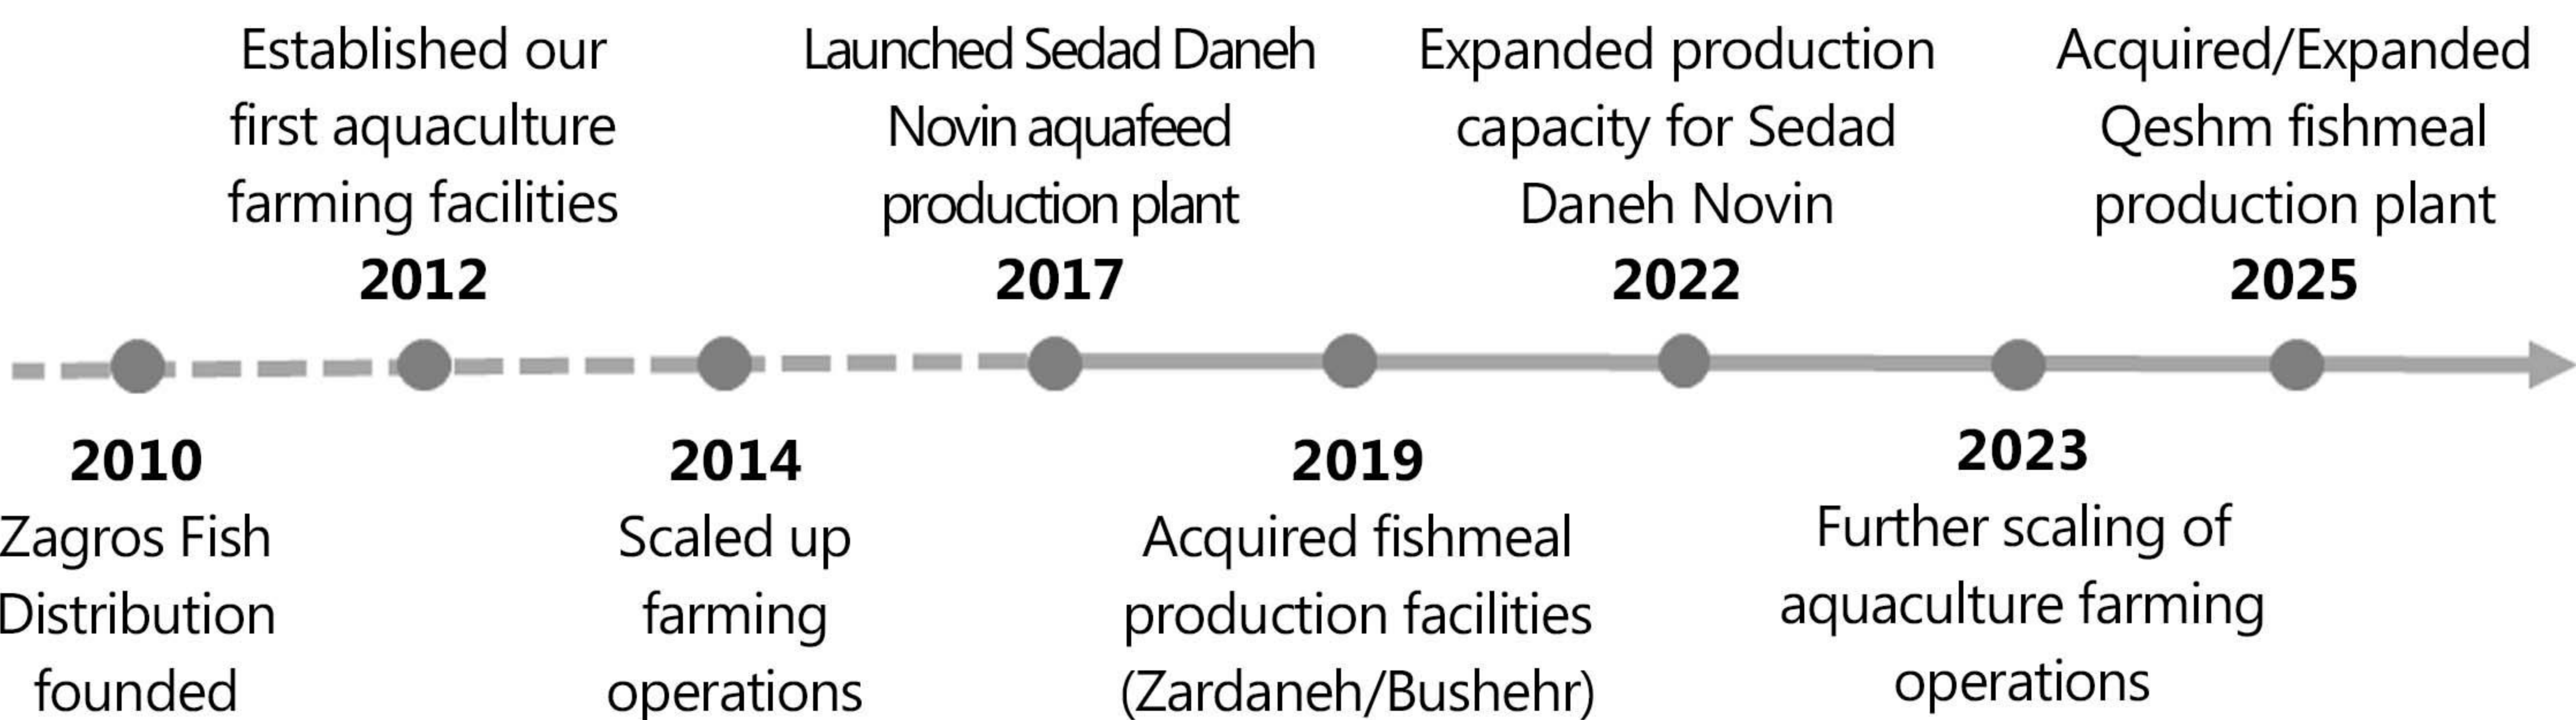

Global Reach

Bridging the gap between Iranian quality and global standards by providing sustainable solutions to growers. worldwide.

Your Partner in Aquaculture Excellence

At Sedad Daneh Novin, we are dedicated to the growth and profitability of aquaculture farmers. We believe that high-quality feed is not just a product; it is the cornerstone of success in aquaculture. Since 2017, we have been committed to leveraging cutting-edge technical expertise, a specialized team, and modern industrial infrastructure to produce feed that precisely meets the biological needs of aquatic species. By developing our specialized fishmeal production lines in Qeshm and Bushehr and integrating our supply chain, we ensure consistent quality, optimized Feed Conversion Ratios (FCR), and peace of mind for our partners. For us, sustainable quality, innovation in formulation, and prioritizing our clients' profitability are not just slogans-they are our daily commitment.

Rainbow trout

Produced Products

Products Name	Abbreviation	Fish Weight (g)
● Fingerling 1	FFT ₁	10-25
● Fingerling 2	FFT ₂	25-70
● Grower 1	GFT ₁	70-150
● Grower 2	GFT ₂	150-300
● Grower 3	GFT ₃	300-450
● Grower 4	GFT ₄	450≤
● Special Grower 1	SGFT ₁	70-150
● Special Grower 2	SGFT ₂	150-300
● Special Grower 3	SGFT ₃	300-450
● Special Grower 5	SGFT ₄	450≤
● Brood stock	BFT	1500≤

Chemical Analysis of Rainbow Trout Feed

Fish weight/ Analysis	Fingerling		Grower				Special Grower				Brood Stock
	FFT ₁	FFT ₂	GFT ₁	GFT ₂	GFT ₃	GFT ₄	GFT ₁	GFT ₂	GFT ₃	GFT ₄	BFT
	10-25	25-75	70-150	140-300	280-500	450≤	70-150	140-300	280-500	450≤	1500 ≤
Crude Protein (%)	45-40		36-42				38-43				41-44
Crude Lipids (%)	14-10		14-18				14-18				16-18
Digestible Energy (Kcal/Kg)	4300		4400				4400				4400
Crude fiber (%)	1/4-3		1/4-3				1/4-3				1/4-3
Moisture (%-max)	12		12				12				12

Benefits of Rainbow Trout Feed:

- Provides a balanced supply of energy and protein for optimal growth
- Helps improve the feed conversion ratio (FCR)
- Supports fish health and resilience throughout the culture cycle
- Ideal for achieving sustainable and cost-effective performance

Composition:

Our premium feed is formulated with a balanced blend of high-quality ingredients, including a specialized fish meal mix (Kilka, sardine, lanternfish, and Southern marine species), wheat, soybean meal, corn gluten, wheat gluten, meat meal, vegetable and fish oils, vitamin-mineral premixes, feed sanitizers, and growth enhancers.

Quality Assurance

Quality is the cornerstone of our manufacturing philosophy. By adhering to rigorous international standards, we meticulously monitor every stage of production-from raw material sourcing to the final product-to ensure optimal nutrient density and absolute feed safety. Our commitment is to provide you with the consistent, high-performance nutrition you need to achieve sustainable farming success.

Precision Laboratory Analysis

Advanced, specialized testing and purification processes.

Feed Safety & Biosecurity

Committed to strict health and hygiene standards in every batch.

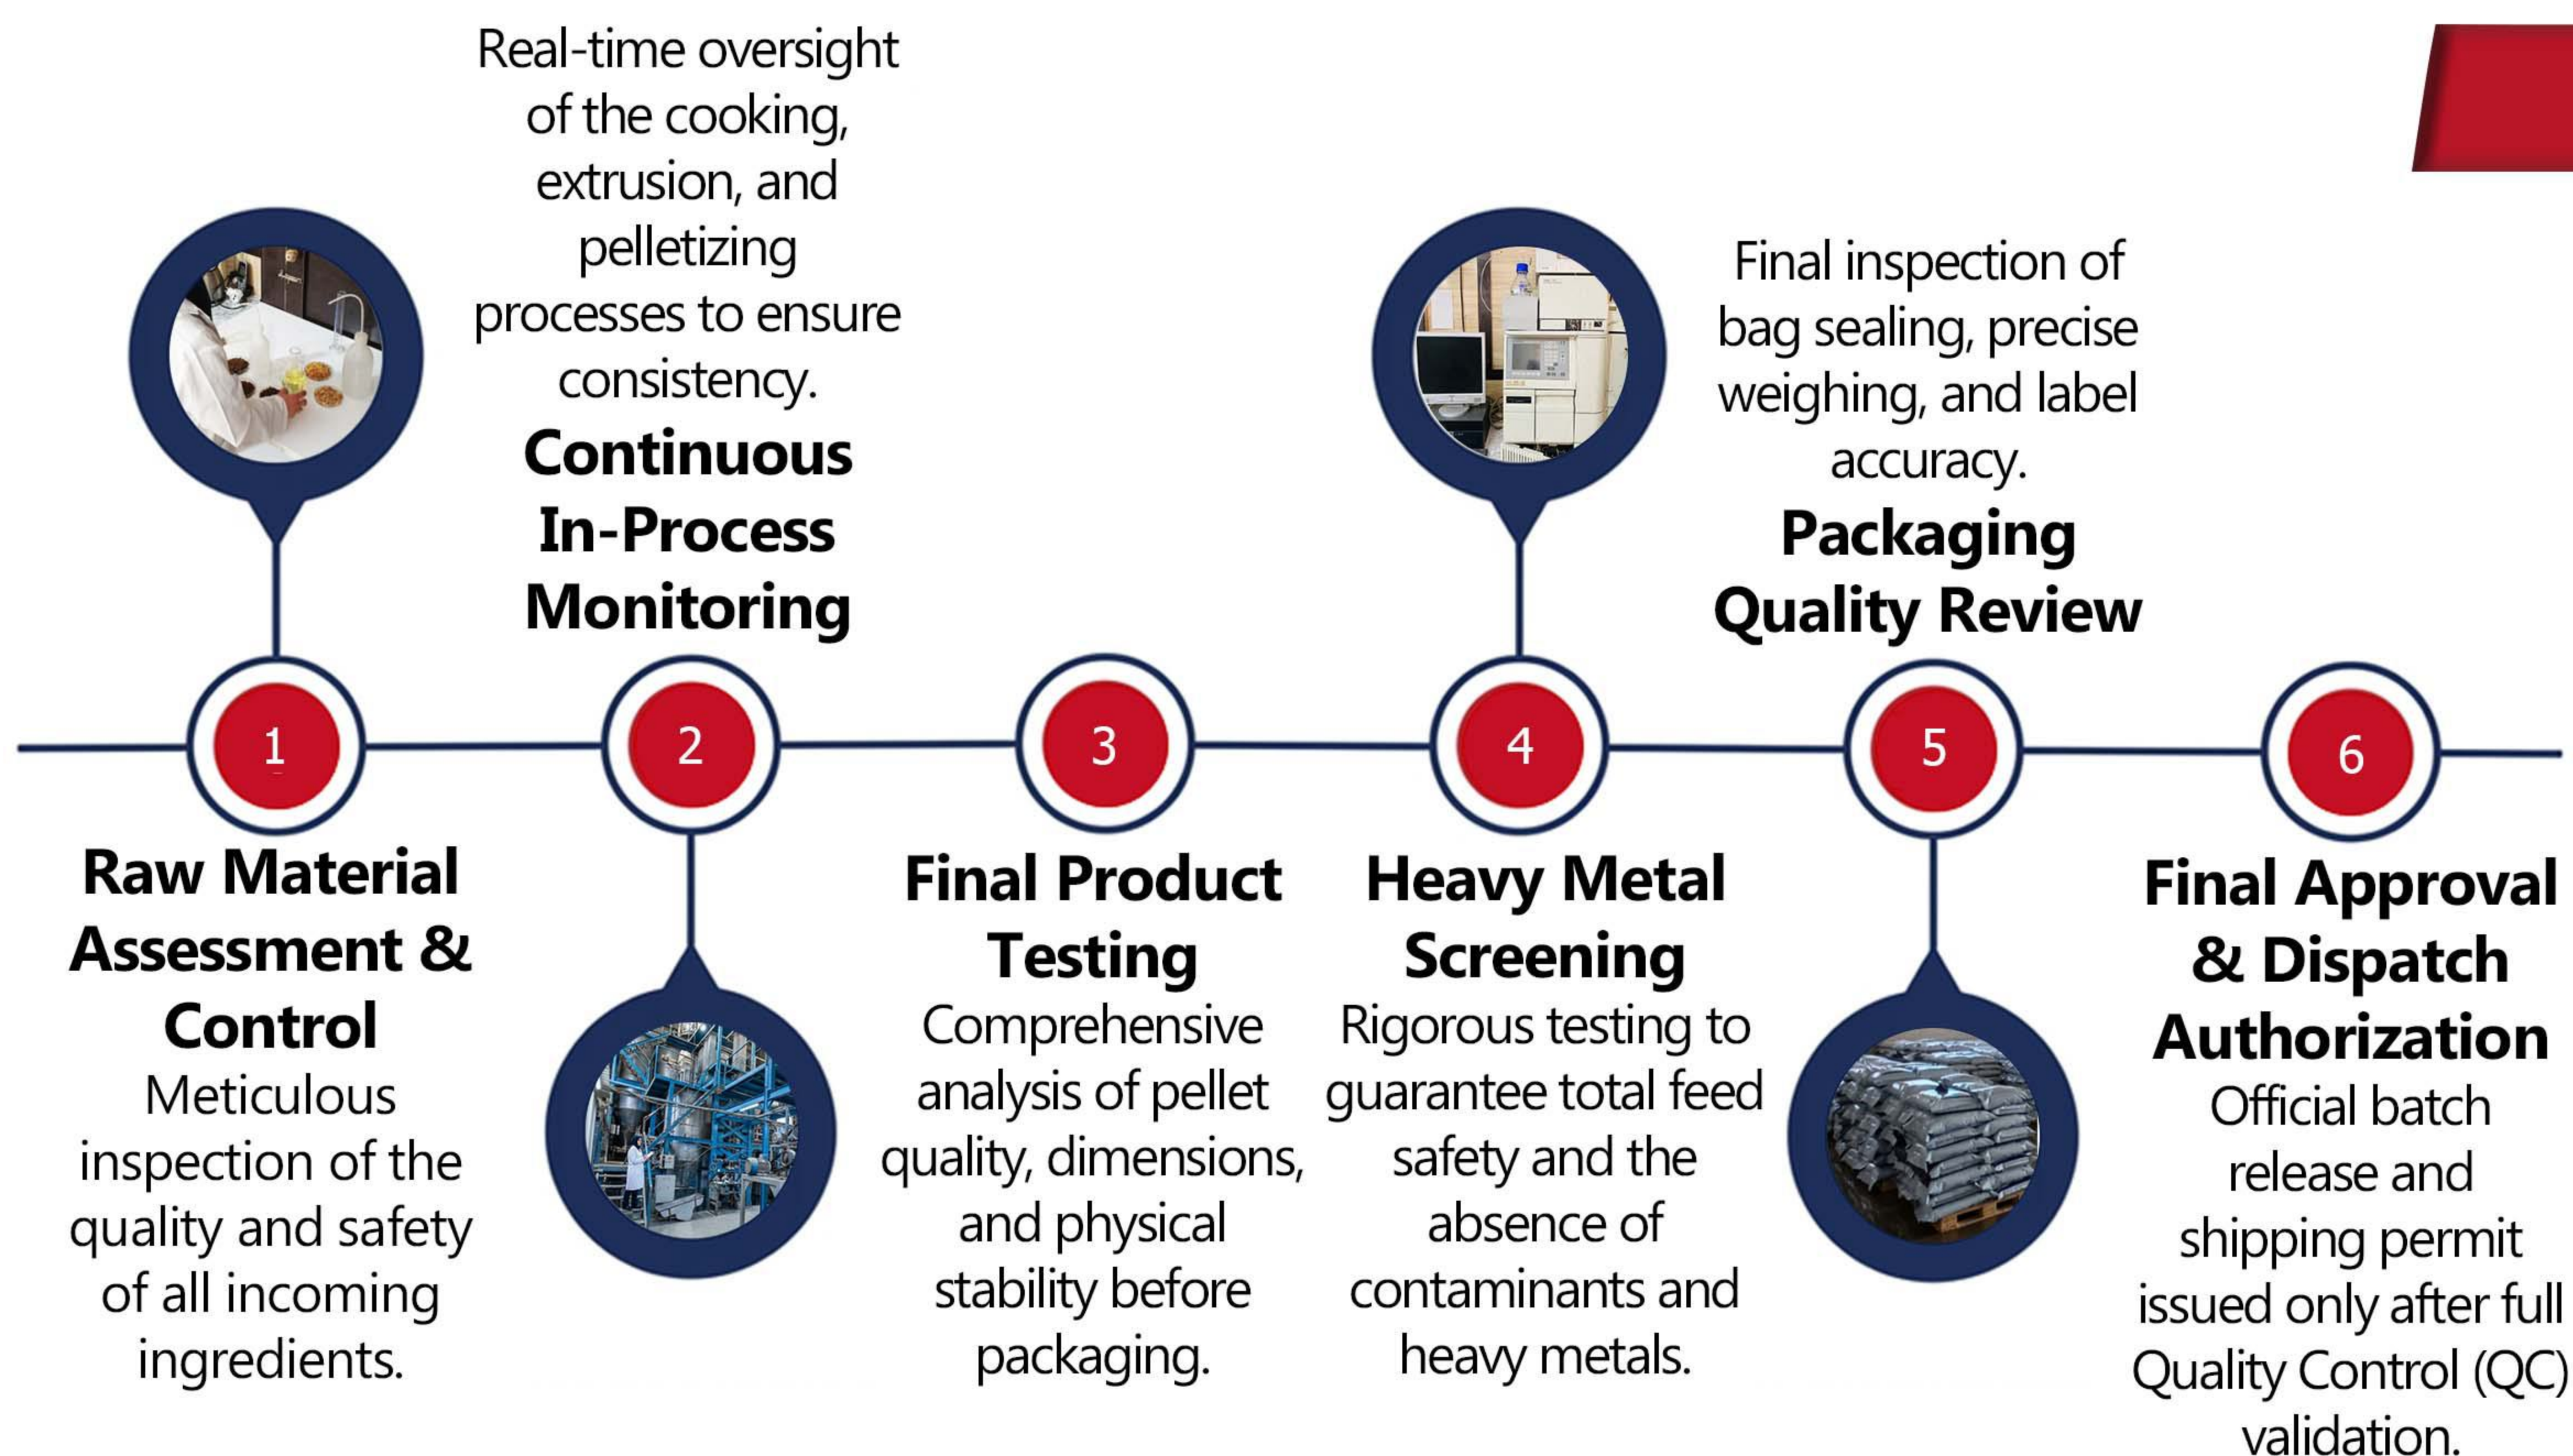

Full-Cycle Quality Control

Rigorous oversight from raw ingredient selection to the finished product.

Global Compliance

Fully aligned with modern, world-class aquaculture standards.

Rainbow Trout Extruded Feed Chart for Optimal Feed Conversion Ratio (FCR)

Fish weight (g)	10–25	25–75	75–150	150–300	300 ≤	Cumulative FCR (Overall)
Water Temp. (°C)						
6–8	1/5	1/18	1	0/85	0/83	0/8-0/88
8–10	1/7	1/36	1/18	0/98	0/96	0/88-0/92
10–12	1/9	1/56	1/3	1/1	1/08	0/92-0/98
12–14	2/1	1/68	1/5	1/25	1/22	0/98-1
14–16	2/6	1/76	1/65	1/45	1/42	1-1/1
16–18	2/55	1/74	1/6	1/4	1/35	1/1-1/2
18–20	2/05	1/56	1/5	1/15	1/12	1/2-1/35
Above 20 °C	Appetite-Based Feeding					
Feeding Frequency (times/day)	4-5	4-5	4-5	3-4	2-3	-
